

Geography

STATEMENT OF INTENT

The most important thing about Geography is to develop a sense of awe and wonder for the world we live in.

- It provides our pupils with a secure knowledge and understanding of places they study, in both Britain and the wider world.*
- It allows opportunities to promote an interest and understanding of diverse places, people and environments that are studied.*
- Our pupils will recognise that there are physical and human features in the world that make those areas unique and different from the locality we live in.*
- It enables pupils to gain a wide range of geographical skills which are developed as pupils move through school.*
- Pupils will engage in fieldwork and educational visits that will enhance and consolidate learning in the classroom and allow pupils to apply the skills they have developed.*
